

Customer No.: 31561
Application No.: 10/065,917
Docket No.: 9023-US-PA

REMARKS

I. Present Status of the Application

The Office Action rejected claims 1-5 under 35 U.S.C. 112, second paragraph, as being indefinitely for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In response thereto, claims 1 and 4 are amended and claims 3 and 5 are cancelled therefrom. Applicant believes that the foregoing amendments do not introduce new matter. Thus, reconsideration of those claims is respectfully requested.

It is noted with great appreciation that the Examiner considers the subject matters of claims 6-7 as being allowable over the art of record, and claims 1-5 would be allowable if rewritten or amended to overcome the rejection under 35 USC 112, second paragraph, set forth in the Office Action.

In response to rejections under 35 USC 112 addressed to the claims 1 and 4, the claimed digital-to-analog converting circuit is further defined how the structure can be applied to the current data driver to provide an analog output by defining the digital-to-analog converting circuit being "operative to generate a data current to drive a plurality of pixels of a display." Applicant believes that the foregoing amendments have overcome rejection under 35 U.S.C. § 112, second paragraph. Thus, after entry of the foregoing amendments, reconsideration of claims 1 and 4 is respectfully required.

CONCLUSION

For at least the foregoing reasons, it is believed that the pending claims 1-2, 4, 6-7 are in proper condition for allowance. If the Examiner believes that a telephone conference would expedite the examination of the above-identified patent application, the Examiner is invited to call the undersigned.
